WEB DEVELOPER
Front-end Developer | React-Js Developer | Web Designer

PROFILE SUMMARY

- Over 2+ years of proficiency in a wide range of technologies, including **React-Js**, **HTML5**, **CSS3**, **JavaScript**, **Bootstrap**, **C**, **SQL**, and **Python**, showcasing creativity in front-end development
- Substantial experience working with an agile team to **develop technical solutions**, actively contributing to projects and **supporting business/client requirements** through collaborative discussions, utilizing Agile methodologies for effective project delivery
- Strong understanding of **responsive** and **user-centric design** principles, ensuring optimal user experiences across various devices
- Familiarity with version control using **Git** and knowledge of **SEO** and website optimization techniques
- Possess a **problem-solving** and **analytical mindset**, honed through effective **debugging** and **troubleshooting** during front-end development at Logicbuzz Infotech
- Skilled **collaborator** known for effectively working within **teams** to drive projects to successful outcomes.
- Proficient in utilizing Microsoft Office 365 applications, including **SharePoint Online**, **OneDrive** for Business, and **Teams**, for collaboration and document management.
- **Quick learner**, adapting **seamlessly** to **new technologies**, evident in the successful implementation of diverse projects and technologies

TECHNICAL SKILLS

Operating Systems: Windows, Android, iOS, Mac OS, Linux
Applications & Tools: ServiceNow, Microsoft Office 365, VS Code, Jira, Git, Outlook
Tools: VMware, G Suite by Google, Packet Tracer
Project Management Fundamentals: Agile, Waterfall, Scrum
Languages: ReactJs, JavaScript, Bootstrap, CSS, HTML, C, Python, SQL, jQuery

EXPERIENCE

React.Js Developer   **August 2021 – July 2023**
Logicbuzz Infotech

- Effectively completed **Front-end development** for **10+** projects using modern technologies like **ReactJs**, **HTML**, **CSS**, and **JavaScript**, **BootStrap** achieved **high performance** and gathered strong **positive feedback**
- Employed advanced **SEO** techniques and metadata optimization that led to a **25%** increase in organic traffic, while adhering to DRY principles streamlined debugging
- Designed and developed **3+ RESTful APIs** with facilitated seamless data exchange between the front-end and back-end, resulting in great improvement
- **Collaborated** with a technical and design team of 5, tracked through **Git** and **Jira**, encompassing various tasks, including design, coding, reporting, and debugging
- Implemented **various responsive web design** with **detailed** strategies, with a focus on **SEO**, ensuring an **excellent** user experience with **quality of service** across devices, leading to notable Lighthouse score improvements of **20%**

PROJECTS

1. **Admin Dashboard Template Github**
   - Developed an administrative navbar template employing **ReactJS**, HTML, CSS, and Bootstrap
   - This template boasts **user authentication mechanisms**, encompassing sign-in, sign-up, and account creation functionalities, all facilitated through Redux
   - Seamlessly integrated a **dynamic data table** via **API integration**. This inclusion enables users to perform actions like data **insertion**, **updating** and **deletion** using **hooks** with ease, enhancing the template's utility for data management.

2. **Keeper App Github**
   Key Technologies: ReactJS, HTML, CSS3, JavaScript, material-UI
   - Created a web application using **ReactJS** and **material-UI** library, letting users add notes.
   - Leveraged React **useState** Hook to track the application state

3. **Weather Application Github**
   Key Technologies: HTML5, CSS3, JavaScript, OpenWeatherMap API, Geolocation API
   - Displayed the retrieved data from the **OpenWeatherMap API** with the appropriate weather description and Integrated the Geolocation **API** to ask for user location permission as a pop-up notification on the web page
   - Fetched background image from Unsplash, according to the location input from the user using **Unsplash API**

EDUCATION

Google IT Support Professional Certificate   **Expected 2024**
Junior IT Analyst Program   Jan 2024 – April 2024
NPower Canada | Toronto

Cybersecurity Certificate   **Expected May 2024**
Coursera | Online

Free Code Camp- Responsive Web Design Certification Program Certificate   October 2023
   - **Diverse Project Scope**: My responsive web design projects span various complexities, addressing challenges like adaptive navigation menus and image optimization
   - **Real-world Simulation**: These projects replicate real-world conditions, focusing on UX, accessibility, and cross-browser compatibility
   - **CSS Proficiency**: I refine my CSS expertise through media queries and advanced techniques, such as CSS Grid and Flexbox, to create responsive layouts
   - **Testing and Portfolio Building**: I thoroughly test my projects for performance and, at the same time, create a portfolio to display my web design skills and work

Bootcamp Course of Web Development   **July 2020-July 2021**
Oscar Career Point | Surat, India
   - Attained hands-on experience in **front-end web development**
   - Completed projects showcasing proficiency in web technologies

Instrumentation & Control Engineering   **June 2015-May 2019**
Sarvajanik College Of Engineering & Technology | Surat, India
